

SAFELIGHT FILTERS FOR GRAPHIC ARTS APPLICATIONS

“Safelight” is defined as the room light and illumination that will not fog photographic material during the time required for normal handling and processing.

We offer a variety of safelight products with filters specially formulated to exactly match the color sensitivity of photographic products on the market. They offer virtually shadow-free illumination, reducing eyestrain and providing a better working environment. These fade-free filters are designed for long life; the safety sleeves will contain glass fragments and protect personnel and valuable equipment in case of any lamp breakage.

Available in a Variety of Formats

- Single lamp complete fixture
- Double lamp complete fixture
- Complete safelight kit including lamp
- Sleeve only without lamp
- Window filter
- Laminated safelight panels

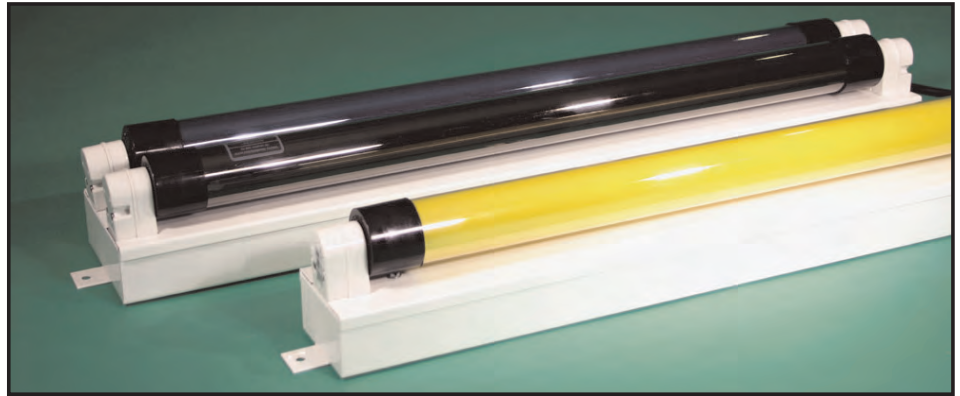

Safelight Kit with or without a Fluorescent Lamp

The Complete Safelight Kit consists of a polycarbonate safety sleeve, fluorescent lamp and safety end caps, and a selection of filters for all photographic processes.

The kit can be used as a replacement lamp for the Single and Double Lamp Complete Fixtures mentioned above, or to install in a locally available light fixture.

The Safelight Kit without a Fluorescent Lamp includes the polycarbonate safety sleeve, safety end caps and a selection of filters for all photographic processes. The sleeve is placed over a T5 (.625"/16mm diameter), T8 (1"/25mm diameter) or T12 (1.5"/38mm diameter) fluorescent lamp purchased locally.

These filters are not suitable for use with high-output lamps.

Single and Double Lamp Complete Fixtures

The Single Lamp Fixture is the perfect choice for a heavy-duty, wall- or ceiling-mounted safelight with one lamp. It features your choice of safelight filter and easy installation.

The Double Lamp Fixture provides maximum safe illumination at a low cost. It is equipped with two safelights of your choice, as it is designed for installations requiring two different safelight environments.

Single Lamp Fixture - Choice of One Filter	
Model	Tube Length
181	18"/46cm
241	24"/61cm
481	48"/122cm

Double Lamp Fixture - Choice of Two Filters	
Model	Tube Length
242	24"/61cm
482	48"/122cm

Window Filter

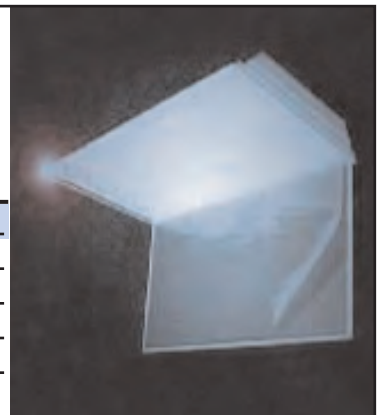

Convert any room into a safe environment for handling your expensive light-sensitive materials. Available in rolls of 4x32 feet/1.22x10m.

Model	Spectral Limit
WF-R10 Red	610
WF-G10 Yellow	475
WF-YG10 Yellow Gold	500
WF-A5 Amber	555
WF-C20 UV Clear	400
WF-V10 Yellow	500

Laminated Safelight Panels

These flat panels are used in conjunction with the diffuser panels in recessed fluorescent ceiling fixtures and are .015"/.381mm thick. Available in standard sizes of 24x48"/61x122cm and 24x24"/61x61cm.

Model	Spectral Limit
R10PF Standard Ortho Red	610
G10PF Yellow	475
YG10PF Yellow Gold	500
A5PF Amber	555
C20PF UV Clear	400
