to remake plates***

KP4 Plate Correction Pen

FBP3000 Plate Correction Pen for Fuji Plates

The FBP3000 pen deletes unwanted images from Fujifilm™ baked plates and the KP4 pen deletes images from Kodak™ Trillian, Thermal Direct, Thermal Gold and Electra XD baked plates and from Anocoil plates.

Benefits

- Removes images from baked metal plates
- Incorporates medium and broad tips in one pen
- Accurately deletes images of various sizes
- Quality construction of barrel, end caps and tips reduces evaporation, thereby extending the life of the pen
- Durable, nylon, chiseled tip for long lasting performance
- Easy and convenient to use
- Permanently eliminates the image
- Used for long runs
- Saves time and money by eliminating the need to remake plates
