

H.S. BOYD PRODUCT GUIDE

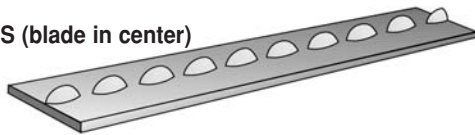

Attach these rules to the impression cylinder of your offset press and perf, score, slit and diecut on the press while printing. Save money and provide your customers with a faster delivery.

- Heat-treated for strength
- Sharpened with diamond-wheel sharpeners
- Available in the original Side Series (SS) or Center Series (CS) for increased pressure and longer runs
- Available in a variety of configurations for a multitude of applications
- The original and best rule on the market

SS (blade on side)

CS (blade in center)

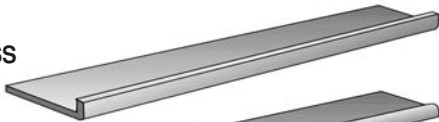

Litho-Perf/SS and /CS

The original and still the world standard for reliability and high-quality performance. Litho-Perf is available in 6-, 8-, 12- and 16-tooth blades with height selections from .0125 to .029", allowing you to perform perforations on a wide variety of different paper and card stocks. Perfect for jobs like direct response mailing cards, coupon booklets and raffle tickets. Litho-Perf/CS is the only center-mounted rule available that is heat-treated, using Boyd's time-tested methods for extended life.

SSR

CS

Litho-Score/SS, /SSR and /CS

The first in-the-run, on-press scoring accessory designed for the offset press, Litho-Score holds consistent register with the printed copy. The rule prepares the stock for a more precise fold and is available in various heights for card and paper stocks. Litho-Score is ideal for scoring newsletters, folders, thank-you cards, announcements and table tents. The scoring edge on SSR and Center Series (CS) rules is rounded to prevent surface cracking on cast-coated stock or when scoring through heavy, solid ink coverage.

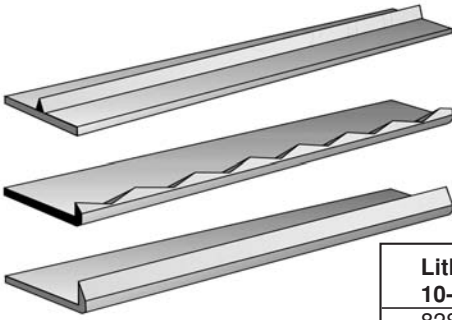

Litho-Score		Litho-Score/CS		
10-Foot Rolls	20-Foot Rolls	10-Foot Rolls	20-Foot Rolls	Stock
826 (SS)	827 (SS)	626	627	Paper and lightweight card
826-3 (SSR)	827-3 (SSR)	626-1	627-2	Coated paper or heavy card

Micro-Perf/SS

Available in side and center series models with heights of .022 and .029" for use on a variety of substrates. Use for precise and clean perforating.

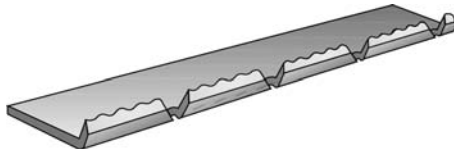

Micro-Perf/SS .022"				
10-Foot Rolls		20-Foot Rolls		Stock
300	30-tooth	301	30-tooth	Paper and lightweight card
400	40-tooth	401	40-tooth	Paper and lightweight card
500	50-tooth	501	50-tooth	Paper and lightweight card
Micro-Perf/SS .029"				
		3001	30-tooth	Card
		4001	40-tooth	Card
Micro-Perf/CS .029"				
302	30-tooth	303	30-tooth	Paper

Litho-Slit/SS and /CS

Litho-Slit eliminates separate runs by permitting on-press, straight-cutting possibilities. The blade is effective for slitting, straight-line diecutting and insertion slots in presentation folders. Use on either card or paper stocks. Litho-Slit can be selected with a straight knife edge or a serrated edge to meet criteria for cleanliness of cut.

Litho-Slit/SS 10-Foot Rolls		Litho-Slit/SS 20-Foot Rolls		Litho-Slit/CS 10-Foot Rolls		Litho-Slit/CS 20-Foot Rolls		Stock

829	Serrated	831	Serrated	629	Straight cut	631	Straight cut	Card
833	Straight cut	832	Straight cut					Card

Litho-Snap/SS

The economical answer to snap-apart forms printing. Litho-Snap functions in the same manner as Litho-Perf, creating perforated, quick separation snap-out or snap-apart forms. Available in 3- and 4-tooth blades.

Litho-Snap/SS 10-Foot Rolls			Litho-Snap/SS 20-Foot Rolls			Stock
820	3-tooth	Paper	821	3-tooth	Paper	
822	4-tooth	Paper	824	4-tooth	Paper	
823	4-tooth	Card	825	4-tooth	Card	

WideTrac/CS

The new WideTrac product with the blade in the center has an extra-wide scoring blade to prevent the stock from cracking and breaking, especially useful on coated and heavy stock. A wider scoring channel means a wider, nicer fold without cracking.

Blade height .025"/6.35mm

Blade width .042"/1.07mm

Base width .1"/2.54mm

Special Low and Special High for Side Series (SS) and Center Series (CS)

Litho-Perf, Litho-Score and Litho-Slit

Thin and heavy stocks no longer present a problem in perforating, scoring and slitting. These specialty rules handle the job as easily as their standard counterparts.

Precision-Perf, Precision-Slit, Precision-Score

The new Precision Rules® feature a square-tooth design that is ideal for perforating all weights of stock against a wide range of surfaces on an offset press. These rules work in conjunction with all on-press finishing systems, including critical kiss-cutting techniques. Available in 20-foot rolls with 8, 12 and 16 teeth per inch and a tooth height of .024"/.6mm or .35"/.9mm (±.0002"), Precision Rules provide an exact cut with minimum pressure every time.

Litho-Punch

Litho-Punch creates a punched circular cut that remains lightly attached for removal by the end-user. Ideal for making circular punches in promotional pieces for binder inserts. Available from stock in the diameter sizes listed below, with other sizes available by special order. A serrated or straight-cut edge may be used. Available for both paper and card stocks.

Size	Paper Package of 1	Card Package of 1	Paper Package of 3	Card Package of 3

1.5"/38mm	858	866	876	885

Sabertooth Perforation Backing

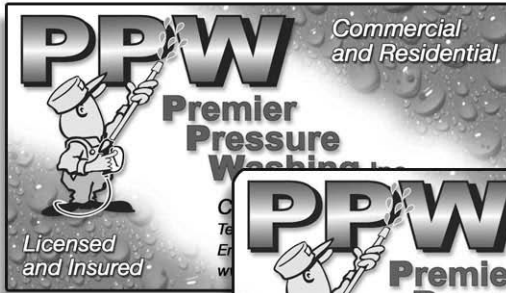

H.S. Boyd's sabertooth backing grips the tympan on the letterpress, not only keeping the rule in register but also protecting the tympan. The backing is secured with double-faced adhesive, with the sharp curved teeth along the edges gripping the tympan.

701	15-foot/4.6m roll x .125"/3.2mm
702	15-foot/4.6m roll x .25"/6.35mm

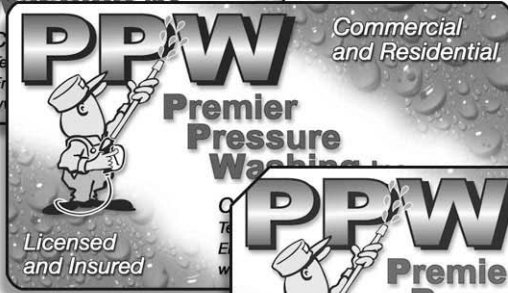

Litho-Dies

Litho-Dies are designed for diecutting on the offset press. Instead of purchasing pre-cut blanks, you can diecut them directly on your off-set press. Doorknob and window dies are available in various sizes. In addition, dies in a variety of complex shapes can be custom made to your specifications. All are mounted on shimstock for ease of attachment and are heat-treated.

Custom Litho Dies

H.S. Boyd custom litho dies are produced from provided die artwork or die line. These dies are manufactured using our standard Litho products, attached to specified shimstock and heat-treated for extended life. Used during the normal press run in soft anvil applications, these dies provide a cost-effective method of in-line diecutting.
